SUMMARY

Software Engineer with ~4 years building and maintaining production systems across backend, REST APIs, integrations, and AI-powered features. Experienced in TypeScript, Node.js, PHP/Laravel, production API integrations, Python and FastAPI. Built stateful AI-agent workflows with tool calling, structured outputs, human-in-the-loop controls, retries, circuit breakers, evaluation, and observability. Strong in cross-stack debugging, API design, workflow reliability, and production system ownership.

PROJECTS

CRM Agent — Stateful Tool-Calling Agent with Safety & Evaluation

[crmAgent](#)

LangGraph · FastAPI · Supabase · Gradio · HF Spaces

- Built and deployed stateful LangGraph agent orchestrating 6 CRM tools with structured outputs and human-in-the-loop approval gates for sensitive actions.
- Implemented classified error recovery using retry-with-backoff and an iteration circuit breaker, with structured JSON logging and cost tracking.
- Enforced irreversible operations behind a code-level interrupt() approval gate that caught 14/14 sensitive actions independent of the prompt - making agent safety deterministic, not prompt-dependent.
- Built a 50-query evaluation harness to measure tool selection, parameter extraction, and guardrail behaviour.

MyHive — Production Conversational Assistant

[myHive](#)

OpenAI GPT, TypeScript, Firebase, Ionic, Angular, Node.js

- Shipped a production conversational assistant on a cohort-based wellness marketplace using OpenAI GPT, answering user queries and recommending available practitioners and exercises.
- Built personalized exercise recommendations that map each user's mood, pain, sleep, and daily health cycles to relevant programs from the platform's catalog.

Storylines — Cruise Ship Booking Platform

[Storylines](#)

HubSpot · HubL · PHP · Laravel · REST APIs · MySQL

- Worked across a high-traffic cruise-booking platform using HubSpot, PHP/Laravel, REST APIs and MySQL.
- Built automated workflows, developed REST APIs, integrated the Secuconnect payment gateway and Google Sheets API, and resolved production performance issues.

PROFESSIONAL EXPERIENCE

Software Engineer | 29 Kreativ

Aug 2022 - Present

- Designed and shipped REST APIs and integrated external enterprise systems through APIs and webhooks, including Stripe and Secuconnect, handling authentication, data mapping, error handling, and production debugging.
- Integrated OpenAI GPT into production, delivering the team's first user-facing chatbot and AI-assisted capabilities.
- Built event-driven workflows for CRM operations, payment-status synchronization, and customer notifications across a platform serving ~40K users, reducing manual operational effort by ~75–80%.
- Led a legacy CodeIgniter 3 → 4 migration and DataTables.js → Tabulator.js migration with zero regression on production application, also designed and shipped REST APIs across products.
- Mentored 5+ junior developers on engineering practices, debugging, and cross-stack troubleshooting.

TECHNICAL SKILLS

Backend & Languages: TypeScript, JavaScript, PHP, Python, FastAPI, Laravel, CodeIgniter

APIs & Systems: REST API design, webhooks, authentication, enterprise integrations, workflow orchestration, retries, circuit breakers

Databases & Infrastructure: MySQL, NoSQL/Firebase, SQLite, Git/GitHub, Docker, CI/CD, HuggingFace Spaces

Agent / LLM Systems: LangGraph, LangChain, RAG, agentic AI, tool calling, MCP, structured outputs, LLM evaluation, guardrails, HITL

Frontend: Ionic, JavaScript, HTML/CSS, Angular

EDUCATION

B.Tech in Electronics & Communication Engineering – ADGITM, Delhi

2018 - 2022
